

# Genomics & Informatics

*Genomics & Informatics* (Genomics Inform) is owned and published by the Korea Genome Organization (KOGO). It is published four times per year (Mar, Jun, Sep, and Dec) in an online version. *Genomics & Informatics* welcomes high-quality research papers presenting novel data on the topics of gene discovery, comparative genome analyses, molecular and human evolution, informatics, genome structure and function, technological innovations and applications, statistical and mathematical methods, cutting-edge genetic and physical mapping and DNA sequencing, and other reports that present data where sequence information is used to address biological concerns. The journal publishes papers based on original research that are judged after editorial review to make a substantial contribution to the understanding of any area of genomics or informatics. Only manuscripts written in English under the *Genomics & Informatics* author guidelines are accepted. *Genomics & Informatics* follows the open access journal policy. All of the content of *Genomics & Informatics* is freely available online. Digital files can be read, downloaded, and printed without charge.

Manuscripts for submission to *Genomics & Informatics* should be prepared according to the following instructions. *Genomics & Informatics* follows the Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals (<http://www.icmje.org>).

## EDITORIAL POLICY

**Copyright:** The regulations for acceptance of a manuscript for publication automatically include the consent of the author(s) to transfer the copyright or license to KOGO. Authors should complete a Copyright Agreement Form (CAF) at the time of proofreading. The corresponding author can sign on behalf of any co-authors. The CAF can be obtained from the editorial office. Acceptance of the agreement will ensure full copyright protection and help to disseminate the article to the widest possible readership in print and electronic formats. The authors are responsible for obtaining permission to reproduce copyrighted material from other sources.

The authors assure that no substantial part of the work has been published or is being considered for publication elsewhere. When any of the results are to appear in another journal, details must be submitted to the Editor-in-Chief, together with a copy of the other paper(s) and the expected date(s) of publication.

**Disclaimer:** The publisher, editors, and reviewers do not assume any legal responsibility for errors, omissions, or claims, nor do they provide any warranty, expressed or implied, with respect to information published in *Genomics & Informatics*.

**Ethics:** Research published in *Genomics & Informatics* must have been conducted in accordance with institutional, national, and international guidelines concerning the use of animals in research and/or the sampling of endangered species. For the policies on research and publication ethics that are not stated in these instructions, the *Good Publication Practice Guidelines for Medical Journals* ([http://kamje.or.kr/intro.php?body=publishing\\_ethics](http://kamje.or.kr/intro.php?body=publishing_ethics)) and the *Guidelines on Good Publication* (<http://publicationethics.org/resources/guidelines>) can be applied.

The Editor-in-Chief reserves the right to reject manuscripts that do not comply with the above-mentioned requirements. The author will be held responsible for false statements or failure to fulfill the above-mentioned requirements.

**Statement of Informed Consent:** Copies of written informed consent and Institutional Review Board (IRB) approval for clinical research should be kept. If necessary, the editor or reviewers may request copies of these documents to resolve questions about IRB approval or study conduct.

**Statement of Human and Animal Rights:** All human investigations must be conducted according to the principles expressed in the Declaration of Helsinki. All studies involving animals must state that the guidelines for the use and care of laboratory animals of the authors' institution, or of any national law, were followed.

**Authorship:** All authors must have participated in the research and/or article preparation. The corresponding author is responsible for ensuring that all individuals included as authors on a manuscript must: 1) agree to be listed; 2) have contributed to the research reported; 3) approve the submitted version of the manuscript. The corresponding author should be prepared to explain the presence and order of these individuals. The statement that all authors have approved the final article should be true and be included in the disclosure.

**Conflict of Interest Statement:** The corresponding author must inform the editor of any potential conflicts of interest that could influence the authors' interpretation of the data. Examples of potential conflicts of interest are financial support from or connections to pharmaceutical companies, political pressure from interest groups, and academically related issues. In particular, all sources of funding applicable to the study should be explicitly stated.

# Guide to Authors

# Genomics & Informatics

**Originality and Duplicate Publication:** No part of the accepted manuscript should be duplicated in any other scientific journal without the permission of the Editorial Board. If duplicate publication related to the papers of this journal is detected, the authors will be announced in the journal, their institutes will be informed, and the authors will be penalized.

## SUBMISSION OF MANUSCRIPT

The manuscript should be submitted in an MS Word file format. The recommended font is Times New Roman with a 12 point font size. All manuscripts must be submitted online through the *Genomics & Informatics* e-submission system at <http://submit.genominfo.org>. Any questions concerning manuscript submission should be directed to: Editor, Genomics & Informatics, Korea Genome Organization, The Korean Federation of Science and Technology Societies, Room number 1011, 635-4 Yeoksam-dong, Gangnam-gu, Seoul 135-703, Korea (<http://www.kogo.or.kr>, Tel: +82-2-558-9394, Fax: +82-2-558-9434, E-mail: [kogo@kogo.or.kr](mailto:kogo@kogo.or.kr)).

## PEER REVIEW AND REVISION OF MANUSCRIPTS

### Peer Review

A manuscript is generally reviewed by at least two peer reviewers qualified to evaluate the manuscript. An initial decision will normally be made within one month of receipt of a manuscript. A manuscript which has been published or of which a substantial portion has been published elsewhere will not be accepted. The Editor-in-Chief is responsible for final decisions regarding the acceptance of a peer-reviewed paper.

### Manuscript Revision

When a manuscript is returned to the corresponding author for revision, the reviewed manuscript must be re-submitted within one month, unless the authors request an extension.

A galley proof and reprint order form will be sent to the corresponding author. The corresponding author is responsible for communicating with the other authors about revisions and final approval of the proofs. The first proof-reading is the author's responsibility, and the proof should be returned within three days from the date of receipt.

## PREPARATION OF MANUSCRIPTS

### General Requirements

Authors are recommended to keep the length of papers below ten printed pages (30 typed pages of manuscript including figures and tables) for original articles, four printed pages for research communications, and two printed pages (approximately 1,400 words or 1,000 words plus one figure) for application notes. All sections of the typescript should be double-spaced on one side of A4 paper (210 × 297 mm), and all pages must be numbered in order.

### Original Articles

Original research articles are full scientific reports of original research. The manuscript should be organized as follows: Title Page, Abstract & Keywords, Introduction, Methods, Results, Discussion, Acknowledgments, References, Tables, and Figure Legends. The Results and Discussion may be combined.

### Research Communications

Rapid communications are intended to rapidly communicate novel ideas and results in new and developing areas of genome research that are of special interest or wide applicability. The manuscript organization is as follows: Title Page, Abstract, Main Text, Conclusion (if applicable), and References.

### Application Notes

Application notes are short communications about novel software, new algorithm implementations, databases, and network services (web servers and interfaces). The manuscripts include the following: Title Page, Abstract & Keywords, Availability, Introduction, Main Text, References, and Supplementary Information.

### Letters to the Editor

Critical comments are welcomed for correcting errors of published facts and for providing alternative interpretations of published data. The sequence for a Letter to the Editor is the following: Title Page, Text, References, and Names and Affiliations of Authors. If needed, tables and figures can be included. A Letter to the Editor should not be longer than a printed page.

### Review Articles

Review Articles are usually solicited by the Editor-in-Chief. Authors wishing to prepare a review article should contact the Editor-in-Chief to discuss the suitability of the subject for the journal. There is no specific requirement for subsections of the body text of the paper.

# Genomics & Informatics

## Book Reviews

Invited book reviews can be published. Manuscripts should include the following: Title of the Book Reviewed, Author(s) and Editor(s) of the Book, and Publisher (city, state and country), Total Pages, ISBN Number, Text of the Review, and Reviewer's Name with Affiliation.

## Manuscript Format

**Title and Abstract:** The title page should include the (1) full names of all authors, the name(s) and address(es) of the institution(s) at which the work was carried out, (2) the telephone and fax numbers, the E-mail address of the corresponding author, (3) and a running title of no more than 50 characters, including spaces. Place an asterisk (\*) after the corresponding author. The abstract should be unstructured and a single paragraph of fewer than 250 words. References should not be cited in the abstract. Six or fewer keywords should be appended to the abstract in alphabetical order. When possible, the keywords should be those found in the Medical Subject Headings of Index Medicus.

**Main text:** All papers should be divided into the following sections and appear in this order: (1) **Introduction:** The paper begins with an introduction without subheadings that reviews the literature and states and justifies the purpose of the research. (2) **Methods:** This section should contain sufficient detail so that all procedures can be repeated, in conjunction with the cited references. The manufacturer and model number should be stated in this section, for example, as Sigma Chemical Co. (St. Louis, MO, USA). (3) **Results:** This section should describe the results of the experiments. Extensive interpretation should be reserved for the Discussion section. The results should be presented as concisely as possible. Footnotes should not be used and will be transferred to the text. Gene symbols should be italicized; protein products are not italicized. (4) **Discussion:** This section should provide an interpretation of the results in relation to previously published work and to the experimental system at hand. The Results and Discussion may be combined. (5) **Acknowledgments:** Information concerning the sources of financial support should be included in the acknowledgments.

**References:** The references should include only articles that are published or in press. Unpublished data, submitted manuscripts, abstracts, and personal communications should be cited within the text only. References are to be numbered in the order of citation within the article in brackets. References with up to six authors must list all names; for more than six authors, the first six names should be listed, followed by "et al." Journal names should be abbreviated in accordance with the ISO 4 standard (<http://xxx.lanl.gov/abs/cond-mat/0107391>). Examples of references are given below:

## Dissertation/Thesis

Hwang KB. Hierarchical probabilistic graphical models for large-scale data analysis. Ph.D. Dissertation. Seoul: Seoul National University, 2005.

**Tables and Figures:** Figure legends and tables should be included in the submitted manuscript as separate sections, and should be formatted following the style of the journal. Each figure legend should have a brief, separate title that describes the entire figure without citing specific panels. The manuscript should be submitted with a set of figures of sufficient quality for reviewers to judge the data. All figures may be provided in color for the electronic version of the journal, even if the print version is in black and white. Figures will be printed in color only when in the reviewers' opinions the color is essential.

Photographs and illustrations should be of professional quality. Images should be provided as TIFF files. JPEG is also acceptable when the original format is JPEG. Each figure must be of 300 dpi or higher resolution with

# Genomics & Informatics

good contrast and sharpness. If a figure is to be reduced, all elements, including labels, should be able to withstand reduction and remain legible. Electron and light microscopic figures must be original or scanned copies from the original. The magnification should be indicated on each micrograph with a scale bar.

Tables are to be organized in portrait view and may run, if necessary, to subsequent pages in the vertical direction only. Tables should be designed for printing within two (17.5 cm) columns of width in no less than 10-point font and should not exceed more than the width of a journal page. If a table does not fit into this format, consider shortening row or column labels, using more than one table to display the data, eliminating unnecessary data, or converting table data into a figure or transferring the part of table data to the supplement.

Supplementary materials can be provided to support and enhance scientific information. Supplementary files offer additional possibilities for publishing supporting applications, sequence alignment, background datasets, microarray hybridization experiments, high resolution images, movies, sound clips, and more. Supplementary files will be published alongside the online version of the article on the *Genomics & Informatics* web site. This material will not be edited or formatted; thus, the authors are responsible for the accuracy and presentation of all such material.

## PREPARATION OF MANUSCRIPTS

### Scientific Names

The full formal Latin name for a taxon (e.g., *Homo sapiens*) should be provided the first time that the taxon is mentioned, and should be italicized. In subsequent sentences, the scientific name of all taxa in the same genus should be abbreviated to the first initial of the generic name and the species name (e.g., *H. sapiens*), except where this usage creates confusion or ambiguity. When common names are used, the scientific name should be provided the first time the taxon is mentioned in the abstract, and again the first time that taxon is mentioned in the main manuscript [e.g., “red pine (*Pinus densiflora*)...”]. Other taxonomic designations (e.g., family names) should not be italicized, and common names should not be capitalized.

### Units and Equations

Standard metric units should be used for describing length, height, weight, and volume. The unit of temperature is given in degrees Celsius (°C). All others are in terms of the International System of Units (SI). All unit

symbols must be preceded by one space except percentage (%) and temperature (°C). All equations should be numbered in Arabic numerals.

### Abbreviations

Abbreviations must be used as an aid to the reader, rather than as a convenience of the author, and therefore their use should be limited. Generally, avoid abbreviations that are used less than 3 times in the text, including the tables and figure legends. In addition to abbreviations for SI units, common molecular, chemical, immunological, and hematological terms can be used without definition in the title, abstract, text, tables, and figure legends, e.g., bp, kb, kDa, DNA, cDNA, RNA, mRNA, and PCR. Other common abbreviations are as follows (the same abbreviations are used for plural forms): h (hour; use 0-24:00 h for time), s (second), min (minute), day (not abbreviated), week (not abbreviated), month (not abbreviated), year (not abbreviated), L (liter), mL (milliliter),  $\mu$ L (microliter), g (gram), kg (kilogram), mg (milligram),  $\mu$ g (microgram), ng (nanogram), pg (picogram), *g* (gravity; not  $\times g$ ), *n* (sample size), SD (standard deviation of the mean), and SE (standard error of the mean).

## DISTRIBUTION OF MATERIAL

Publication of a research article in *Genomics & Informatics* is taken to imply that the authors are prepared to distribute freely to academic researchers for their own use any materials (e.g., cells, DNA, antibodies) used in the published experiments. In cases of dispute, authors may be required to make primary data available to the Editor. Nucleic acid and protein sequences as well as X-ray crystallographic coordinates should be deposited in the appropriate database.

## PUBLICATION CHARGE

*Genomics & Informatics* charges US\$200 (KRW200,000) for the first 7 published pages and an extra US\$50 (KRW50,000) per page over 7 pages. Under exceptional circumstances, page charges will be waived if deemed appropriate by the Editorial Board. Authors unable to pay page charges may apply at the time of submission for a waiver of page charges. The color figures can still be included in the journal at no extra cost. All manuscripts accepted for publication have their English checked by a professional English editor provided by KOGO.
