

Supplementary Fig. 2. Scatter plot of the copy number variation (CNV) region, chr20: 42739446–42741539. Light green, purple, and blue dots indicate normal copy, one-copy deletion, and two-copy deletion, respectively. Linear discriminant function (LDF) values from CNVtools were used for the clustering analysis. SegMean is segmental mean value (log R ratio). A loss is indicated in blue and purple.
